

4 Ways IT Teams Can Eliminate Patient Care Roadblocks

1

CUT YOUR HELPDESK QUEUE IN HALF (OR MORE)

IT teams spend **40% of their time** resolving print-related tickets.

Problem

Cure

Empower your end users.

Stop the flood of helpdesk tickets at the source. Users can install and access printers themselves with just a few clicks so patients don't have to wait, and helpdesk can prioritize other things.

133 million

patient records were **exposed, stolen, or impermissibly disclosed** in 2023.

Problem

2

KEEP PHI MORE SECURE THAN A HOSPITAL GOWN

Cure

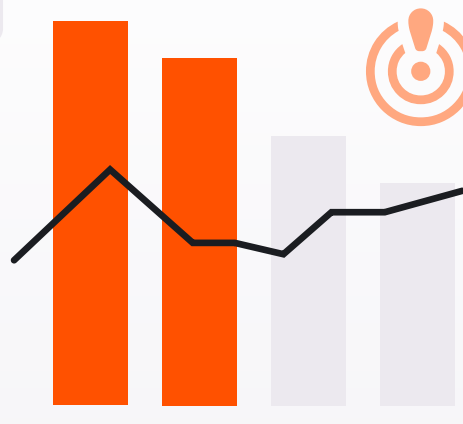

Implement processes that protect PHI.

Configure user permissions and secure release to minimize the risk of printed PHI and ensure that sensitive documents aren't left unattended in the printer tray. Audit print activities, set rules to manage printed information, and create workflows that use AI to automatically redact sensitive PHI from print jobs in real time.

BONUS: Vasion Print segments every device, reducing your organization's attack surface. As a Zero Trust printing solution, Vasion Print authenticates every user through integrations with leading Identity Providers.

3

SMASH WORKFLOW SILOES

30% of healthcare professionals identify data siloes as the biggest roadblocks to adopting new technology.

Problem

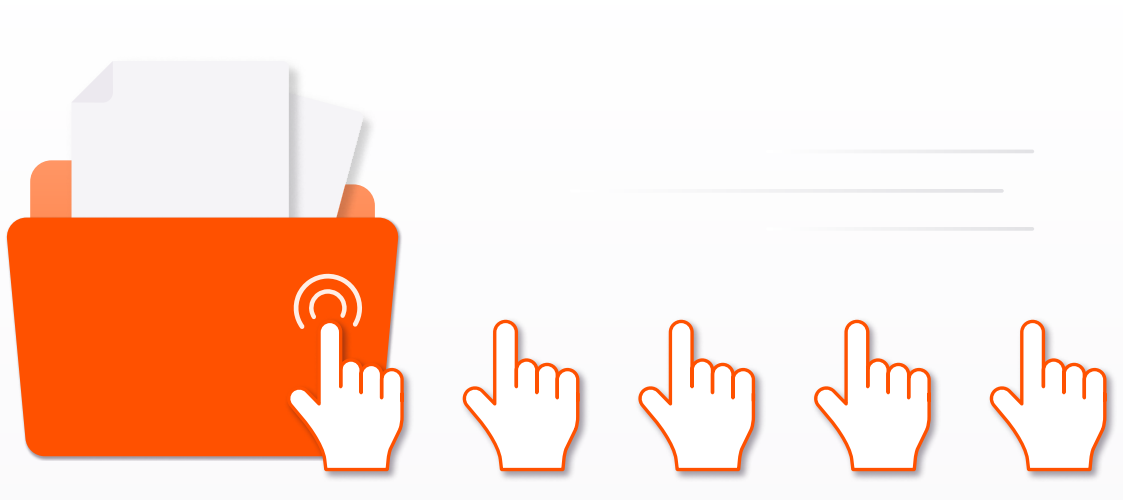

Cure

Unify front- and back-end systems.

Bridge disconnected systems by unifying front- and back-end print management through a single solution, including output for enterprise resource planning (ERP), electronic medical records (EMR), electronic health records (EHR), and document management systems (DMS). Maximize visibility and automate workflows that move data seamlessly throughout the organization, from critical print to secure storage.

DID YOU KNOW?

46% of healthcare executives stated that EHR integration and modernization are one of their top priorities.

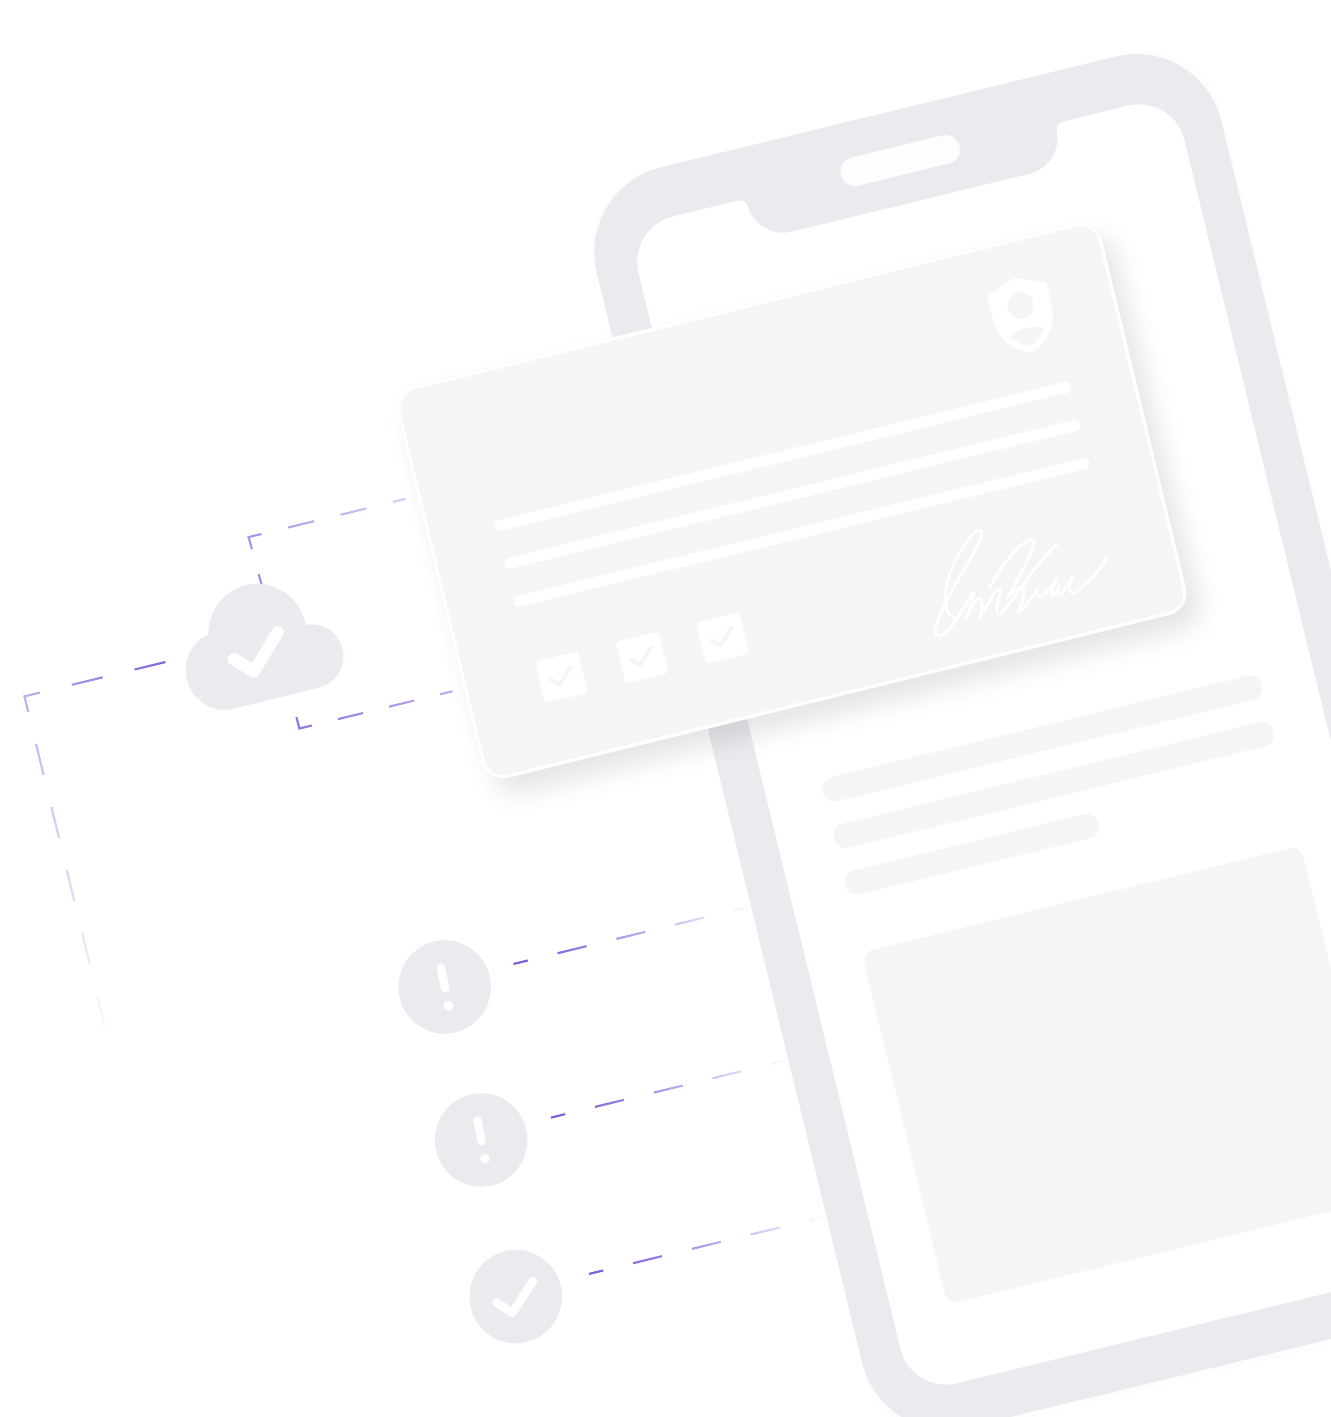

Output management solutions require **too many manual touchpoints.**

Problem

4

DON'T SETTLE FOR OUTDATED SOLUTIONS

Cure

Automate your output management.

Eliminate manual intervention and document handling to increase print efficiency. Ensure business continuity by protecting critical print operations and scale with a cloud-based output management solution.

Output Automation ensures documents are never held up due to failures or downtime, increases efficiency with rules and routing, reduces operational errors, and helps you meet compliance standards.

Eliminate Patient Care Roadblocks with Vasion Print

The comprehensive cloud solution IT teams need to eliminate legacy infrastructure, secure and protect printed PHI, and automate document processes with a single platform.
