

How to Jumpstart Your Digital Transformation

Printing is still at the core of how work gets done in your office, leaving a gap between paper and digital processes. With so many disconnected point systems to navigate, making a transition seems anything but easy. Now you have a way to lead your digital transformation, with a single, streamlined SaaS solution designed to simplify and accelerate your organization's journey.

1 Ditch Your Old Printers

Paper-based processes prevent you from modernizing. Reduce outdated, resource-intensive, single-function printers. Cut down the volume of physical documents, storage boxes, and inefficient manual oversight to lower costs.

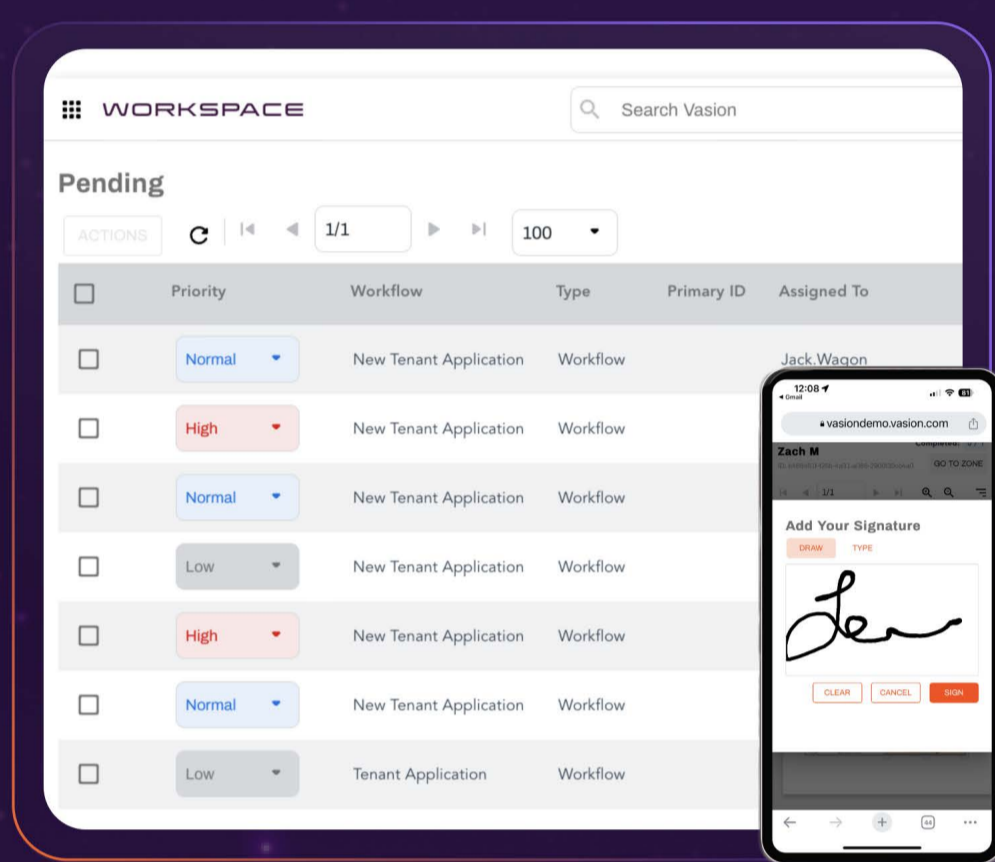

70%

reduction of time spent on print management by customers.

\$3M

average savings for companies utilizing automation software vs. those without.

2 Digitize Your Processes

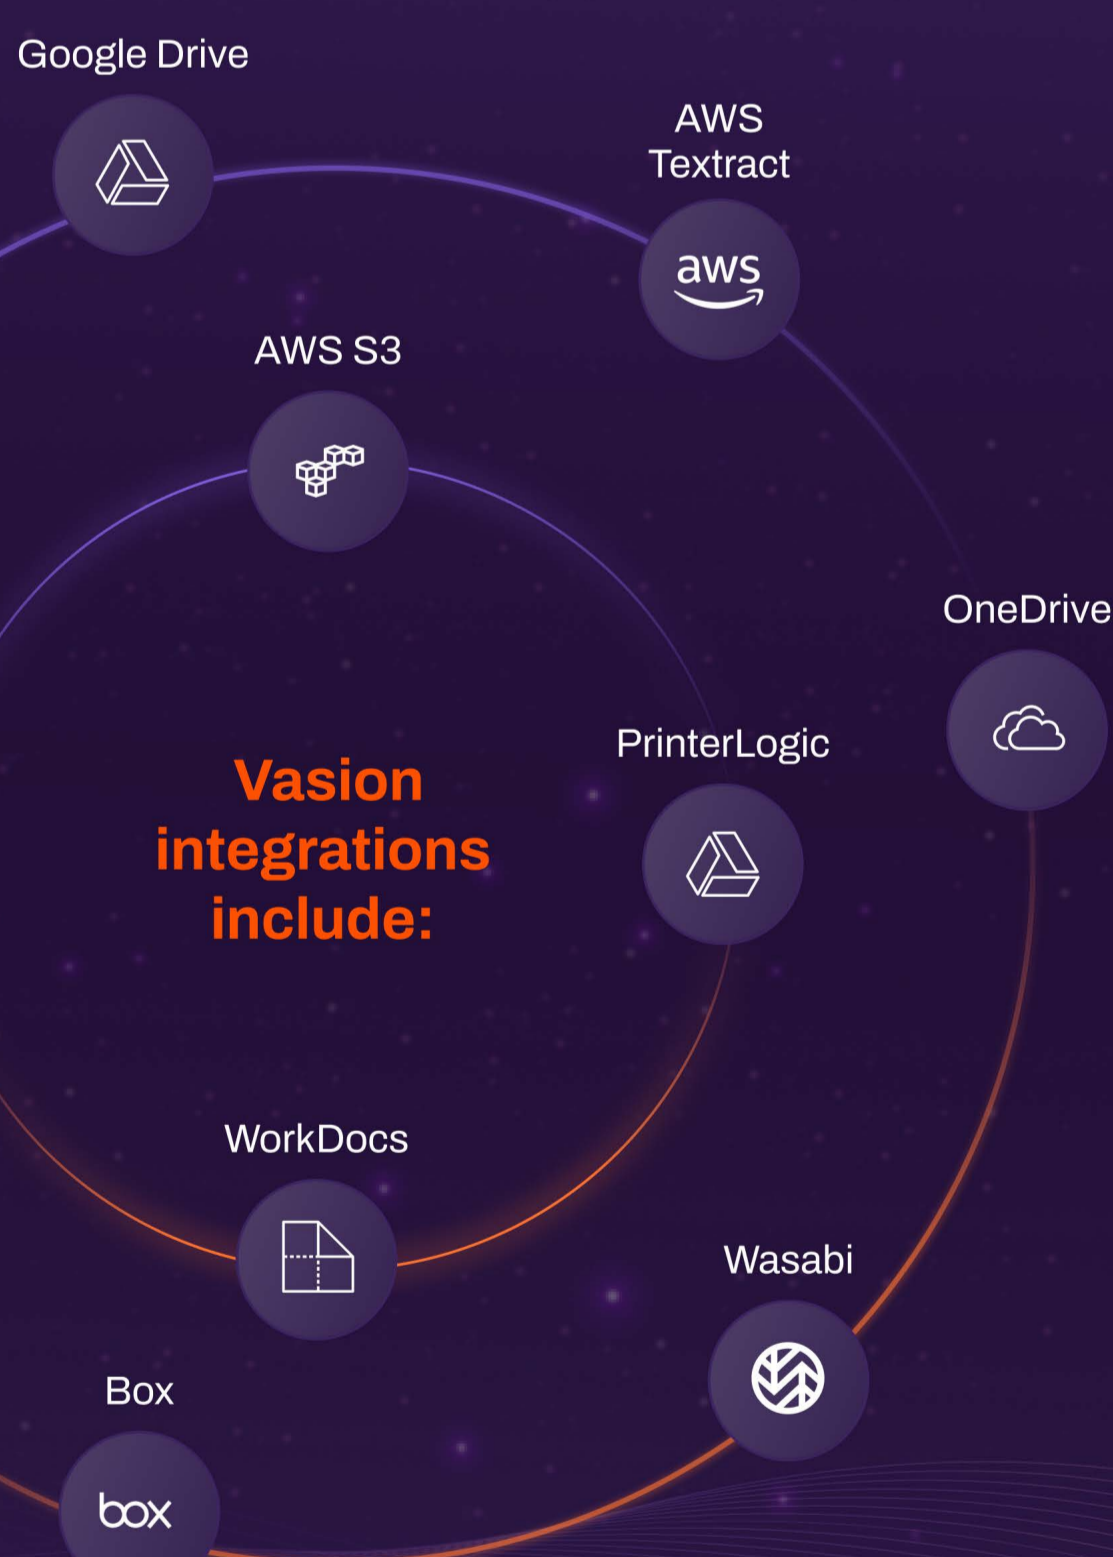

Transform your organization by replacing everyday paper-based tasks with digital processes to increase productivity and strengthen security.

3 Consolidate Your Tech Stack

Replace disconnected point tools with a single solution that supports every department's needs without multiple price tags.

Single-Function Applications Vasion Replaces with One System

- eSignature
- Storage
- Content management
- Automation software
- Data capture tool
- PDF editor
- Collaboration tool
- Print management

4 Easily Integrate with Third-party Systems

Vasion's integrations with third-party cloud storage and text extraction applications ensure documents are organized, accessible, and protected at all times.

5 Go Digital in Weeks, Not Months

Implementation takes only a few weeks with no onsite installations and limited interruptions to operations.

52%

of IT decision-makers are adopting digital workflows to avoid printing.
