PrinterLogic by **VASION**

Streamline Printing, Reduce Costs, and Empower Schools with the PrinterLogic Education Solution

"PrinterLogic streamlined printer management at our school. It makes things much easier for me, and [print management] takes a lot less of my time."

Dennis Klaustermeyer, Computer Technician, United Local School District

Student Printing Is Costing You

Your school's students, faculty, and administrators are printing all day—from worksheets, homework assignments, and essays to report cards, registration forms, and permission slips. With that much output comes accidental and unnecessary print jobs, filling recycling bins and draining your budget. You need a solution to manage these printing habits on a large scale across the entire district—with a lower price tag.

Archaic Print Management Is Costing You Too

You're also not just dealing with your school's print environment— you're deploying classroom and student devices, addressing issues, overseeing projects and initiatives, curriculum plans, technology upgrades, and more. Dealing with finicky, costly print servers is just one more task. Print servers demand constant maintenance, manual updating, troubleshooting, and a chunk of your limited budget, which is time and money you don't have to spare. To scale with the needs of your school, you can't let old infrastructure hold you back.

PRINTERLOGIC CUSTOMERS SEE A+ RESULTS

91%
of customers see 100% ROI or more from PrinterLogic solutions.

70%
reduction of time spent on print management by customers.

66%
of our customers reduced print-related help desk calls by half.

Support Your School with PrinterLogic

Our PrinterLogic Education solution is tailored specifically to fill the needs of our education institutions at a discounted cost. With PrinterLogic, you can ditch costly archaic infrastructure, promote sustainable printing practices, and empower the success of teachers, administrators, and students.

✦ Centrally-Managed Administration

Deploy and manage all printers and queues throughout the school from a single, web-based console, eliminating scripting and GPOs.

✦ Automated Administrative Processes

Boost the efficiency and productivity of administrative tasks with traditionally slow turnaround times, lengthy approval processes, and paper forms to manage and store.

✦ Mobile Printing

Centrally manage printing with mixed-OS devices native to the classroom, like tablets, smartphones, Chromebooks, and iPads, without complex configuration.

✦ Print Quota Management

Allocate print quotas for students by the volume or cost of the print job to prevent wasteful printing habits and overspending.

✦ Simplified Scanning

Enable administrators and faculty to easily access and share forms, records, and information between teams through email or cloud storage with a universal scanning experience—no matter the MFD manufacturer.

✦ Advanced Reporting

Capture and monitor printing and scanning activity in real-time with comprehensive reports from a school or department down to a user level for greater insight into print usage for budgetary purposes and auditing.

Vasion Automate Core

Includes: ✓ 5 Automate Creators ✓ 2500 completed workflows ✓ Up to 25 print queues
