

# Secure Mobile Printing

## With the Vasion Mobile Application

Mobile devices have become a standard resource across enterprises as the working world evolves beyond traditional office settings. While they're integral tools, they pose new complexities for IT teams. We believe printing from any mobile device should be as easy as it is from a traditional workstation, which is why our mobile app works effortlessly with your existing printer fleet, allowing you to adapt quickly while promoting user mobility.

## Reducing Mobile Print Challenges

Today's workforce wants the flexibility to work from anywhere and on any device. However, mobile print management for phones and tablets has been difficult for IT due to available solutions requiring new processes, print servers, and even costly printer upgrades.

### With the Vasion mobile app, you don't have to wrestle with:

- Upgrading printers to gain mobile-printing functionality
- Installing client-side software to print from mobile devices
- Managing servers to support remote printing from mobile devices
- Remote workers who need to print from their home office, at a different branch office, or in the field
- VPNs or external portals to support the printing needs of contractors and BYOD users
- Stressing over the health and safety of employees returning to the office and using shared printer surfaces

### KEY BENEFITS

#### Secure Mobile Printing

Users can natively and securely print from their mobile device directly to any printer on the organization's network.

#### Uniform Printer Deployment

IT can manage printer deployments for iOS and Android devices the same way they do for other operating systems.

#### Secure Release Printing Tool

Users can quickly release a print job from their mobile device, or by scanning a QR code at the printer.

### VASION PRINT CUSTOMERS SEE REAL RESULTS

**91%**

of customers see 100% ROI or more from Vasion solutions.

**70%**

reduction of time spent on print management by customers.

**66%**

of our customers reduced print-related help desk calls by half.

# Protect Confidential Data and Alleviate IT Burden

The Vasion Mobile App saves time and resources by empowering users to print securely from their phones to any network printer. Employees get the freedom to manage their own printing, while IT sets safeguards and customized print policies to protect sensitive organizational data.

## Supports Popular Mobile Application Managers (MAMs)

From Microsoft Intune to other leading MAMs, Vasion makes it easy to deploy secure mobile printing to iOS and Android devices—no custom configurations or extra apps needed.

## Easy to Install

Network changes or additional hardware are not required—the setup process is as easy as installing the app and logging in.

## Touchless Printing

The app allows users to print secure release or pull print jobs directly from their mobile device without touching the CPA—they simply scan a QR code from the app at the printer and select the print job they want to release.

## Mobile Printing Just Got a Whole Lot Easier

**“With [Vasion’s] mobile printing our own staff can print easily from their mobile devices. It’s been easy for us to set up that functionality.”**

**Earl Demiar | IT Support Services Manager, Hunton & Williams**

## Top IdP Support

The mobile app supports the same IdPs as the SaaS and VA platforms, including 10 leading IdPs like Active Directory, Okta, Azure AD, Google Identity, and more.

## Print From Anywhere

With Vasion’s Off-Network Printing feature enabled, you can keep printers on your most secure networks while allowing all end users to print from anywhere.

## Mitigate Mistakes

Secure Release Printing, including the QR release feature, mitigates mistakes by ensuring held documents are released at the correct printer and only into the hands of the person who submitted the print job.
