ELIMINATE PRINTERS

The Next Step in Your Digital Transformation

You eliminated print servers. But printers are still a problem. Single-function printers perpetuate inefficient paper-based tasks and are costly to maintain. You need a single solution that will simplify infrastructure and move you closer to your digital transformation goals.

By using an all-in-one digital solution like Vasion, you'll no longer have to wrestle with:

- Combining paper tasks with digital processes
- Slow turnaround time on paperwork
- Low visibility into the status of work and location of documents
- Siloed systems that keep departments disconnected
- Stacks of backlog records that still need to be converted to digital
- Disorganized files that aren't quickly accessible
- Data loss and security breaches from misplaced paper files

A Digital Transformation Partner You Know

Partner with a brand you trust, PrinterLogic, that helped eliminate your print servers, and now offers a solution to get you to the next stage of your digital transformation: **Vasion**.

One Solution to Accelerate Your Digital Transformation

1   Reduce Physical Infrastructure

Eliminate print servers, single-function printers, and their upkeep materials while reducing physical storage space.

2   Digitize Existing Documents

Intelligently capture paper documents into digital files for quicker accessibility and shareability of company data.

3   Integrated Print Output

Leverage multi-function print technology that integrates automatically with your digital workflows.

4   Connect Point Systems

Integrate with third-party solutions like Google Drive, OneDrive, Box, AWS S3, Amazon WorkDocs, etc.

5   Fully Customizable Workflows

Build eForms and ready-to-go, no-code workflows using drag and drop functionality without the help of developers.

6   Improved Internal Communications

Strengthen cross-departmental communication with one solution for streamlined collaboration, visibility, file sharing, and content management.
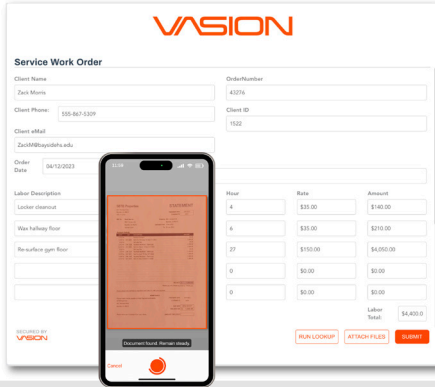

7   Enhanced Security and Compliance

Meet compliance regulations with audit trails, user access controls, encrypted data, automated reporting, and secure storage.
